ABOUT US

We have been focusing mainly on wooden planter boxes made only from solid wood for 10 years. Each product is handmade to the best possible quality. We're based in northern Moravia in the village of Bílov on a local farm with more than 100 years of tradition.

Focus on a narrow product range - wooden pots and boxes, which gives us time to work on our products in depth and continuously improve them.

We strive to invent new solutions and believe in honest work and craftsmanship. We also believe that production can be in harmony with nature and try to make products with "souls". Lucky enough that our work is a hobby.

The mark of responsible forestry

Certificate FSC ®

FSC ® certification is a confirmation of our interest in the sustainability of our production. As the first company from the Czech Republic and Slovakia in the production of garden furniture, accessories and playground equipment, we received this certificate from TÜV SÜD Czech s.r.o. in 2020.

The certificate confirms that the wood we use has been fairly harvested and processed from certified forests, where the regeneration and environmental friendliness of the whole process is ensured.

Collection KOMBI is our bestseller. It's made of larch in the strained parts and the rest of the product is made of quality Nordic spruce.

The name reflects the main advantage of this collection. Thanks to the same height and width, it creates an ideal combination of these products with each other.

It is ideal for lining terraces, front gardens or space boundaries. Thanks to the different lengths it's suitable for combination on any terrace.

Technical details

KOMBI + GIGANT

The construction of the product is a wood-to-wood connection using a wood groove. We use the old pin and mortise technology to connect the upper frame and supporting prisms or connection to the groove without the use of screws. No screws are used in the entire construction and no joint is visible.

The most important thing is the correct choice of wood and its protection. It's a living structure and has many pitfalls and rules. We have to know what kind of wood it is, what part of the trunk it comes from, how much moisture it needs and who prepares it to make sure we get the premium quality for our products.

The material of the upper frame is 25/67mm of larch and the basic structure is made of 45x45mm thick prisms also made of larch or Siberian larch.

The larch or Siberian larch we use is the best and most durable option for this category of garden pots.

Thanks to our experience with a farm where almost everything is made of wood, we are aware that maintenance must not be lengthy and complicated. Therefore, we have developed our own 4-component thin-layer glaze, which, due to its natural oil-based nature, is absorbed into the material. Our products only need to be repainted once every 3-5 years without sanding. It takes few minutes and you're set for years.

color: chestnut dimensions (LxWxH): 43x43x38cm material: Nordic spruce/larch

- The flower pot has a plastic liner to separate the substrate from the wood and thus prolong its life as much as possible.
- It's from KOMBI collection, due to the same height and width can be combined with TATRAN 90, LONG and TRIO. You can create an exceptional composition.

Collection GIGANT

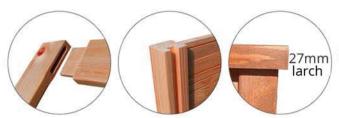

The Gigant collection is based on the successful Kombi collection - the difference is the walls lined with nop foil and the three-layer bottom, which is larger and allows larger plantings. Technically and materially, it's identical to the Kombi collection, including the option to add including the option to add durable wheels and brakes.

The advantage of flower pots is the possibility of planting everything from flowers to trees. Can be combined with other flowerpots thanks to the same height (50 cm) and width (55 cm) of all products in the collection.

Collection Larch CLASSIC

This collection is made of FSC-certified larch slats with dimensions 20/95mm, 20/115mm and 20/145mm. The slats are connected in the corners by overlapping and the connection is treated with decorative stainless steel screws from both sides.

The product is treated with our organic paint based on natural oils. The price/quality ratio is at the highest level in this collection. The whole product is built on plastic legs, equipped with an overflow, chemically stable foil and a solid bottom - covered with plastic foil.

Collection MAMUT

Each production has its top products and collections. This is ours. Using a 45mm thick frame and 80mm thick side prisms made from premium Siberian larch creates a perfect product with maximum durability and an exclusive look.

We have used the best we can in this product, using the old technology of screwless wood-to-wood joints. The 120mm wide frame connected by a pin and mortise is our pride.

Technical details

The construction of the product is a wood-to-wood connection using a wood groove.

For the connection of the upper frame and supporting prisms, we use the old technologies of pin and mortise or connection into the groove without the use of screws. No screws are used in the entire construction and no joint is visible.

The most important thing is the correct choice of wood and its protection. It's a living structure and has many pitfalls and larules. We have to know what kind of wood it is, what part of the trunk it comes from, how much moisture it needs and who prepares it to make sure we get the premium quality for our products.

The material of the upper frame (45x120mm) is always made of larch and the prisms (80x80mm) of Siberian larch. The sides of the product are also made of larch, fixed in a groove in the solid prisms.

The larch or Siberian larch we use are the best and most durable option for this category of flower pots. Due to its structure and resinous nature, larch is best able to withstand weather conditions and its lifespan, even without maintenance, is said to be up to 30 years or more.

Thanks to our experience with a farm where almost everything is made of wood, we are aware that maintenance must not be lengthy and complicated. Therefore, we have developed our own 4-component thin-layer glaze, which, due to its natural oil-based nature, is absorbed into the material. Our products only need to be repainted once every 3-5 years without sanding. It takes few minutes and you're set for years.

Collection OAK

The collection meets the highest quality standards. It is made of thick (70x45mm and 150x100mm) premium oak (Quesrcus petraea).

It is a perpetual material, its lifetime is calculated from 100 years upwards if the product is manufactured correctly. It is no coincidence that rafts from the time of the Great Moravian Empire have been found in the Morava River.

We raised the flower pots and high beds 10 cm above ground level for design reasons. This frame also repels slugs and protects the planting.

This is one of our best collections.

Collection OAK

Kvadrant OAK color: natural

dimensions (LxWxH): 42x42x40cm/55x55x50cm 65x65x50cm material: oak

color: natural dimensions (LxWxH): 100x80x40cm/200x80x40cm material: oak

The prisms from which the bed is made are interconnected by screws that are not visible - we place a dried oak stake on the head of the screw. It soaks up natural moisture from the surrounding air and expands. The whole joint becomes completely rigid.

Collection GEO POTS

A great solution for fencing seating areas, terraces or other spaces in the garden. The combination is possible thanks to the same width and height of all flower pots in the collection.

Thanks to the different lengths, it can be used for any space. The main color is teak, but we also supply them in other colors at no extra charge - natural, oak and anthracite.

We use the premium Siberian larch in width 20x95mm. Larch or Siberian larch are the best and most durable option for this category of flower pots. Due to its structure and resinous nature, larch is best able to withstand weather conditions and its lifespan, even without maintenance, is said to be up to 30 years or more.

Lighting is an additional product option.

The flower pots are lined inside with a permanent chemical-resistant nop film, equipped with plastic legs for maximum product durability. The bottom is 3-layered, consisting of a solid bottom, 5 cm thick prisms, 3 cm extruded polystyrene and covering foil. Equipped with one or two water overflows. Makes maximum use of the interior space and is suitable for larger plants, shrubs and trees.

Collection Larch PRISMA

It is based on larch prisms (45x90mm) connected by wooden pins every 25cm. They are bonded with waterproof adhesive. The prisms are joined at the corners by overlapping.

It consists of our 3-layer bottom, extruded polystyrene, solid grate and impermeable foil. Lifetime without maintenance is for 35 years and more.

The prisms from which the bed is made are interconnected by screws that are not visible - we place a dried oak stake on the head of the screw. It soaks up natural moisture from the surrounding air and expands. The whole joint becomes completely rigid.

Sales stands and racks

We produce various types of sale stands and racks for your shop and home, even according to requirements.

The advantage is the low price, which is close to the price of a disposable paper stand.

The rack has a longer service life and greater load capacity.

Stand BASIC

color: natural material: Nordic spruce 31M - 64x36x120cm 41M - 64x36x160cm 51M - 64x36x200cm

Stand CLASSIC

color: natural material: Nordic spruce 23l - 60x35x65cm 33l - 60x35x120cm

43I - 60x35x160cm

53I - 60x35x200cm

width x depth x height

Stand OBLIQUE

color: natural material: Nordic spruce 31M - 64x36x120cm 41M - 64x36x160cm 51M - 64x36x200cm

Customized shelves

Wine rack

Made of solid Siberian spruce. Used to display wine, alcohol or other similar goods. The side and top can be used for marketing placement.

Stand JACK DANIELS

Supplemented by tampon printing. We engrave/burn into wood on customer's request. We also produce a combination of metal and wood like this to create a truly professional solution.

Presentation table

For the production of logos we use laser engraving, various types of cut-outs and printing, milling logos into wood, etc.

Set 6 TETRIS

Our own system of sales racks.

FROSCH

RYBÍZÁK/CURRENT

CRATE stand

CRATES

We make the boxes from solid Nordic spruce on our farm. All materials for production are from the Czech Republic, it's exclusively handmade by Moravian cabinetmakers. The crates are ground on 4 sides and connected with maximum precision with double securing of strength. We test them up to 50 kilos.

Suitable for fruit, vegetables or other foodstuffs. Use at home in the kitchen, as the basis for gift wrapping or in restaurants as a substitute for plastic products. You can use them as food containers or for ecological storage.

CRATE 2

material: Nordic spruce dimensions (LxWxH):

XS - 24x17x12cm

S - 30x24x12cm

M - 40x30x12cm

L - 60x36x12cm

CRATE 3

material: Nordic spruce dimensions (LxWxH):

S - 30x24x17cm

M - 40x30x17cm

L - 60x36x17cm

CRATE 3 shelf

material: Nordic spruce dimensions (LxWxH):

M - 40x30x17cm

L - 60x36x17cm

CRATE 4

material: Nordic spruce dimensions (LxWxH):

XS - 24x17x23cm

S - 30x24x23cm

Skittles/Bowling (small)

WOODEN BUCKETS

The quality oak planter with metal hoops and handles stands out for its rustic aesthetic and sturdiness. It will become a great and above all very useful decoration for your terraces, balconies and gardens.

The wood with its natural pattern will come into its own and the bucket will gain lightness for spring and summer decorations. The antique-style metal handles in brass add even more authenticity to the plant bucket.

Flower pot BUCKET garden

dimensions (Ø xH): 28x17cm / 5,5 l 35x21cm / 11 l 42x26cm / 25 l 50x31cm / 40 l

GARDEN FURNITURE

Made by hand in the Czech Republic from hard ash/maple wood 35mm thick. Connected by carpentry joints for maximum durability and load-bearing capacity. We do not varnish furniture, we use ecological water/oil dilutable paints based on natural oils. The advantage is minimal maintenance without the need for grinding. We deliver folded by our own transport throughout the Czech Republic.

We offer engraving of your text as an option. Add the text to your order, we will contact you and fine-tune the text, motto or date according to your wishes.

Stool 70x50x45cm

Little chair 70x50x90cm

Bench 120x50x90cm 160x50x90cm

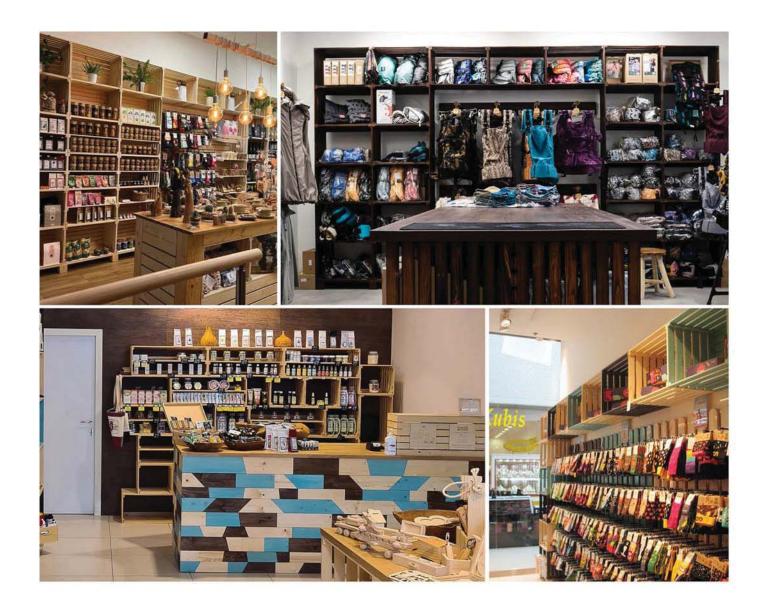

Dinning table 170x65x80cm

We make various types of solid wood shops. Dealing with stores from design to implementation. We also deal with the production of logos and the design of technical solutions for various operations. We have implemented more than 200 stores and are willing to share our experience with you. It's not just about the furniture, it's about your project. We design, advise and find the best solutions.

The advantage of our solution is the affordable price. Solid wood production and the associated benefits - shop image, details, price tags and customized solutions. We produce stores focused on farm food, designer clothing and accessories, giftware, cafes and more.

On request, we can also create a 3D visualisation of your project. If you are creating a new concept or upgrading an old one, it is a good idea to go through it in 3D first. Especially the technical and logical details become clear much easier.

We will prepare everything for you to scale and as close to reality as possible. Various concept errors can then be revealed before implementation.

For example, dimensions for furniture placement, color combinations with painting, etc. If you haven't fine-tuned your colours yet, we'll be happy to help you. The color scheme of the concept is up to you and if it is given by the manufacturer, we can tweak the project to the same colors. If you already have other pieces of furniture in your shop (refrigerators, stairs, doors) we will focus and add everything to the 3D projection. The final colour of the windows or the floor is a matter of course.
